

## IBM unveils new AI model for tracking landscape changes

The geospatial foundation model, a first of its kind, was created from a collaboration with NASA announced in February, and could speed up geospatial analysis by as much as four times. [Read more...](#)

## Evaluating measurement error in remote-sensing deforestation data

Remote sensing methods are transformative tools used to study deforestation, but they are by no means perfect. In the new paper "Remotely Incorrect? Accounting for Nonclassical Measurement Error in Satellite Data on Deforestation," published in the *Journal of the Association of Environmental and Resource Economists*. [Read more...](#)

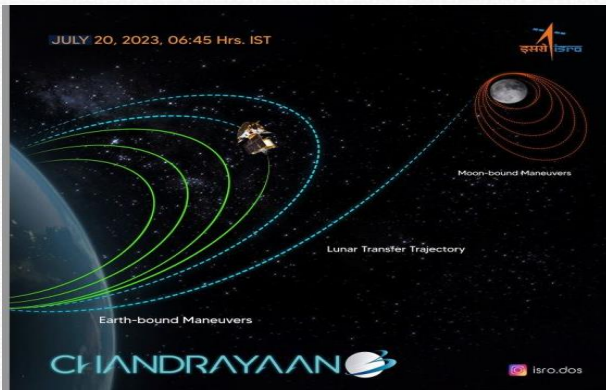

## Google, Microsoft, OpenAI and startup form body to regulate AI development

Four of the most influential companies in artificial intelligence have announced the formation of an industry body to oversee safe development of the most advanced models. [Read more...](#)

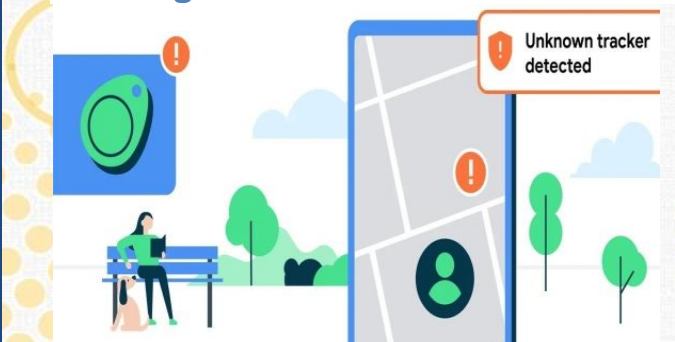

## India's Chandrayaan-3 moon rover mission aces orbit-raising maneuvers around Earth

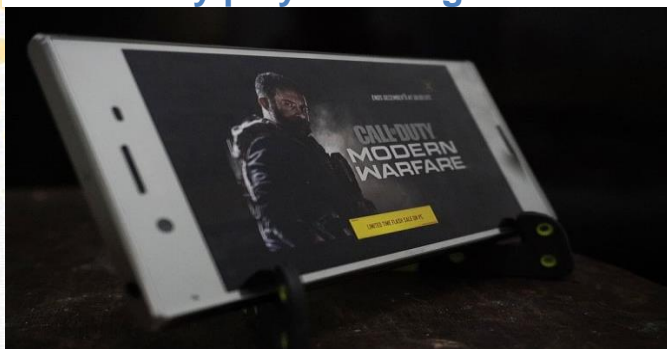

The mission is India's second attempt to touch down on the moon, following the failed 2019 attempt made by the Chandrayaan-2 lander. The new mission has built on the lessons learned from the earlier landing attempt. [Read more...](#)

## Google rolls out automatic AirTag alerts for Android in bid to prevent stalking

Google is announcing that the rollout of unknown tracker alerts is now beginning on devices running Android 6.0 and later. Right now, this only works with AirTags, but Google says it's working with tag manufacturers to expand this protection to other tracking tags over time. [Read more...](#)

## Call of Duty players being infected with self-spreading malware

Modern Warfare 2 warned other players on a Steam forum that hackers "attack using hacked lobbies," and advised using an antivirus, reports TechCrunch.

It looks like the malware mentioned in the thread is on the malware online repository VirusTotal. [Read more...](#)
